CONTENTS

Special Issue
on Lattice Path Combinatorics and Applications

Guest Editor: S.G. Mohanty

Co-Editors: W. Böhm and C. Krattenthaler

Volume 101, Numbers 1–2

Preface		1
Germain Kreweras, 1918–1998	*H. Niederhausen*	3
Tadepalli Venkata Narayana 1930–1987	*S.G. Mohanty*	5
Distribution of number served during a busy period of GI/M/1/*N* queues-lattice path approach	*M. Agarwal*	7
Multivariate Lagrange inversion and the maximum of a persistent random walk	*W. Böhm*	23
The rook numbers of Ferrers boards and the related restricted permutation numbers	*Ch.A. Charalambides*	33
Some results for two-dimensional random walk, II. Additive functionals	*E. Csáki*	49
Sum of powers from uniform distribution moments	*L. Ericksen*	57
A bijective perimeter enumeration of directed convex polyominoes	*S. Feretić*	81
Occupancy urn models in the analysis of algorithms	*D. Gardy*	95
Lattice paths: vicious walkers and friendly walkers	*A.J. Guttmann and M. Vöge*	107
Lattice path approach to transient analysis of M/G/1/*N* non-Markovian queues using Cox distributions	*K. Sen*	133
The maximal height of simple random walks revisited	*W. Katzenbeisser and W. Panny*	149
Random walks and other aspects of the Bailey–Daum distribution	*A.W. Kemp*	163
Existence conditions and properties for the generalized Euler family of distributions	*A.W. Kemp*	169
q-Analogues of the hyper-Poisson distribution	*C.D. Kemp*	179
Transient probabilities of a single server priority queueing system	*A. Krinik, D. Marcus, R. Shiflett and L. Chu*	185
Central and local limit theorems for the coefficients of polynomials associated with the Laguerre ones	*A. Kyriakoussis and M.G. Vamvakari*	191

(*contents continued*)

On reaching head-to-tail ratios for balanced and unbalanced coins *T. Lengyel* 203
Some statistics on Dyck paths *D. Merlini, R. Sprugnoli and M.C. Verri* 211
Planar walks with recursive initial conditions *H. Niederhausen* 229
Multivariate discrete distributions induced by an urn scheme, linear diophantine equations, unbiased estimating, testing and applications *M.S. Nikulin, T.I. Smirnov and V.G. Voinov* 255
Moments of level numbers of leaves in binary trees *A. Panholzer and H. Prodinger* 267
A joint Absorption–Mahonian process *D. Rawlings* 281
Extensions of Gambler's ruin with even odds: multinomial and other models *M. Sobel and K. Frankowski* 291
The Narayana distribution *R.A. Sulanke* 311
